

European Food Contact Regulations TPU 92 A

We hereby, certify that all grades of TPU 92A can be used to manufacture articles in compliance with the requirements of Regulation (EC) No 1935/2004 of 27 October 2004 on materials and articles intended to come into contact with food.

Moreover, all grades of TPU 92A comply with the compositional requirements of Regulation (EU) No 10/2011 of 14 January 2011 on plastic materials and articles intended to come into contact with food.

Some grades contain substances authorised by Regulation 10/2011 but regulated with a specific migration limit and/or dual use components and/or are subject to restrictions. Please contact us for more information.

Please note that it is the responsibility of the article manufacturer to ensure that all conditions and specifications are met by the finished article and the articles manufactured from the above mentioned grade are compliant for use in their intended food contact applications.
